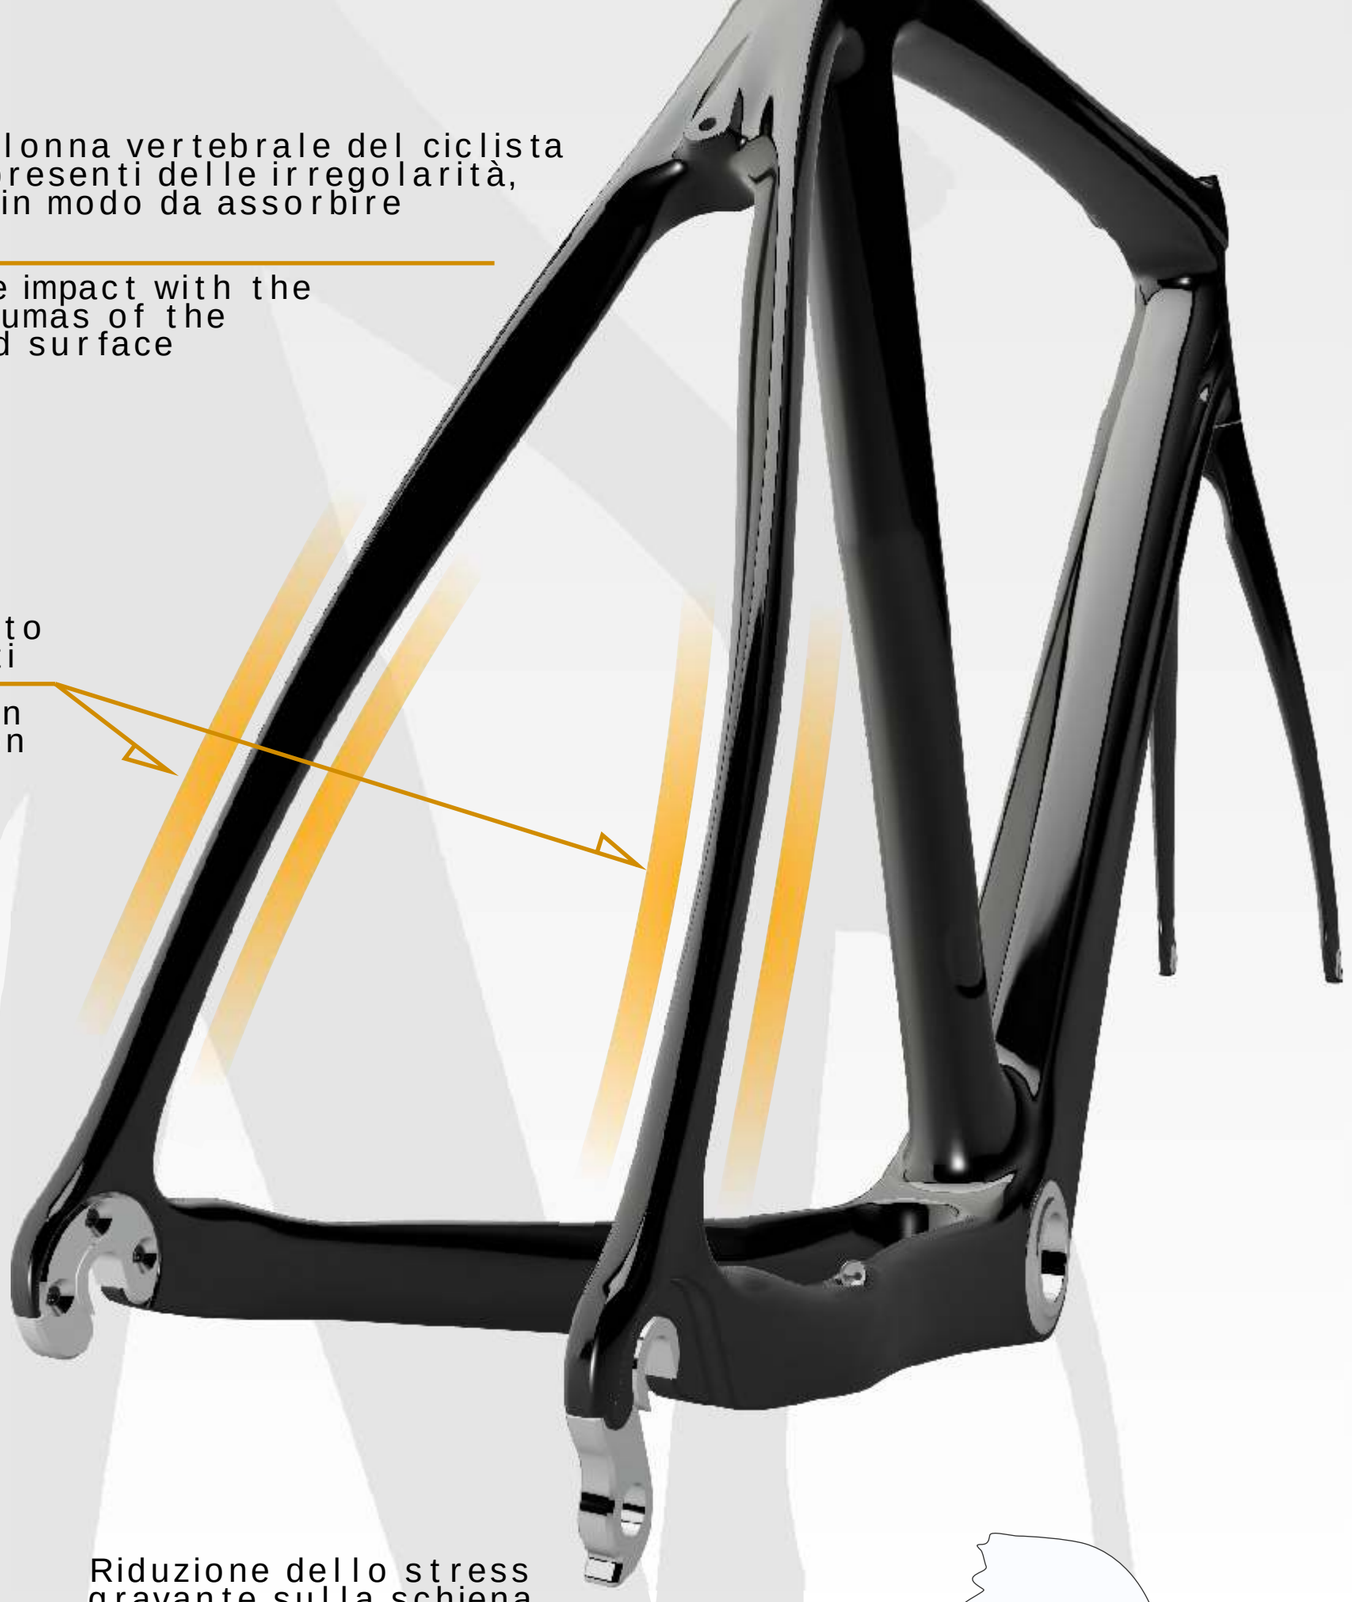
Design by Marco Genovese

Foderi verticali anti-shock
Anti-shock seat stays

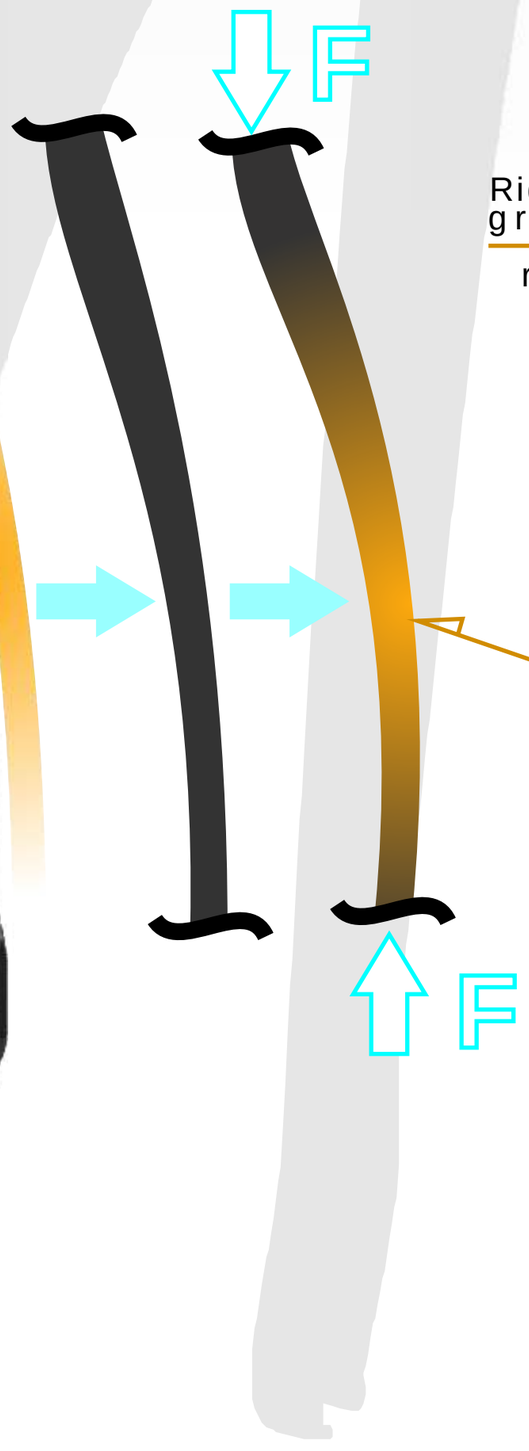
Per attenuare i continui micro traumi a cui la colonna vertebrale del ciclista è sottoposta, ogni volta che il manto stradale presenti delle irregolarità, I foderi verticali del carro sono stati disegnati in modo da assorbire gli urti con il terreno.

The seat stays have been designed to deaden the impact with the ground, in order to ease the repeated micro traumas of the cyclist's spinal column, every time that the road surface becomes uneven



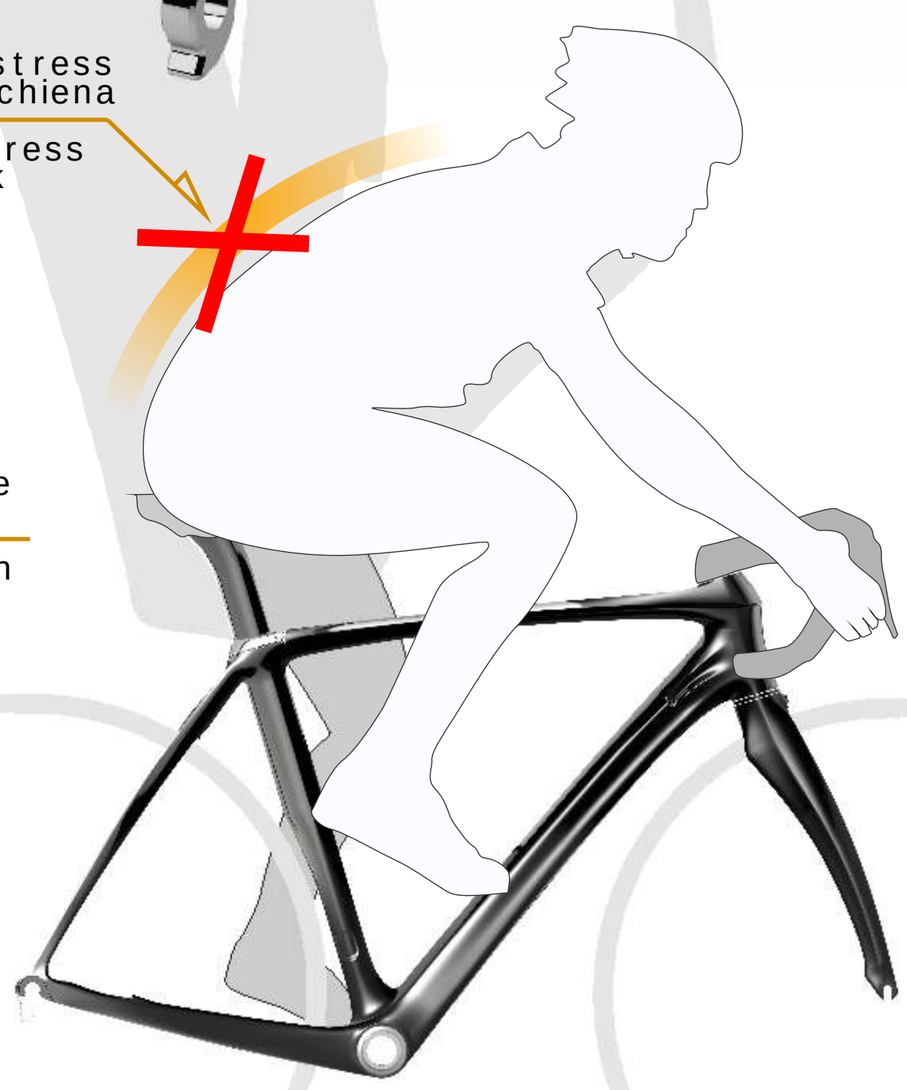
Zona di assorbimento elastico degli urti

Area of absorption of elastic collision



Riduzione dello stress gravante sulla schiena

reduction of stress on the back

Deformazione elastica


elastic strain
